

Team report (3rd stage)

Team name: MoneyMoneyMoney

Team members (their roles):

Danielė Artiušenkaitė (Facilitator/Exhibitor)

Brigita Griguolaitė (Designer/Critic)

Paula Šadenok (Builder/Architect)

Project description:

A Java application that allows users to enter their expenses and assign them to a special category, enter their income, and get general information about their expenses. In other words, a money manager.

Tools and technologies:

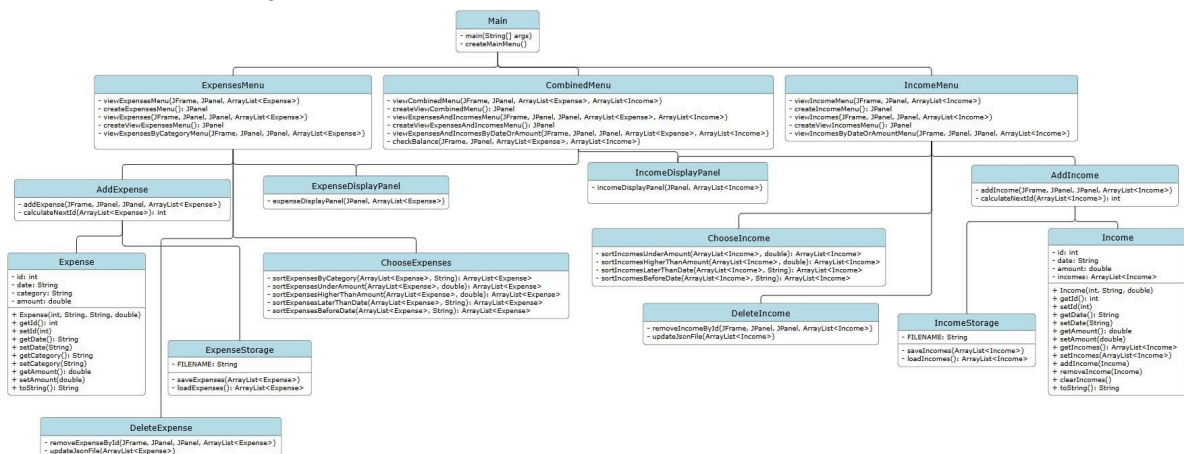

IntelliJ IDEA

Apache NetBeans

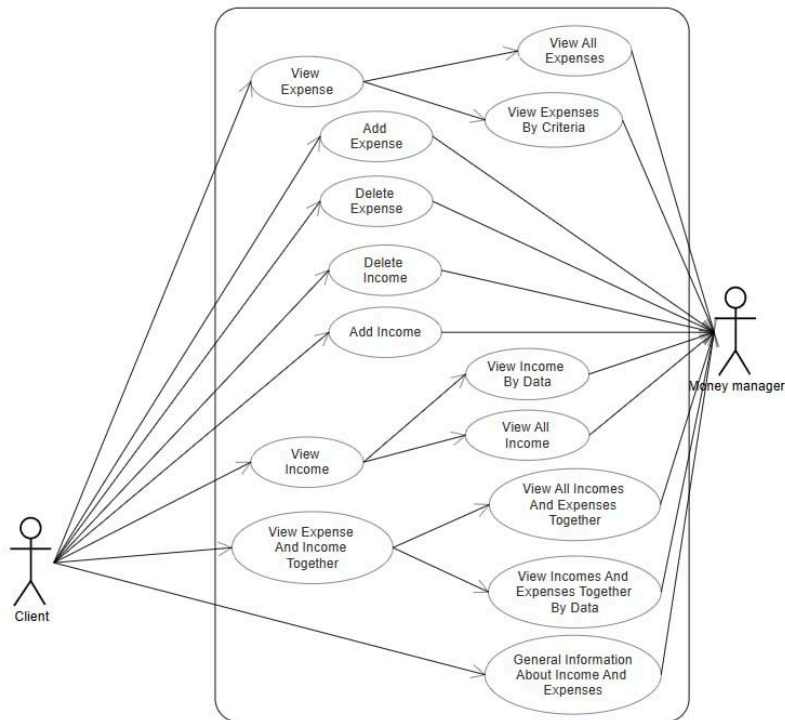

Lucid (lucid.app)

GitHub

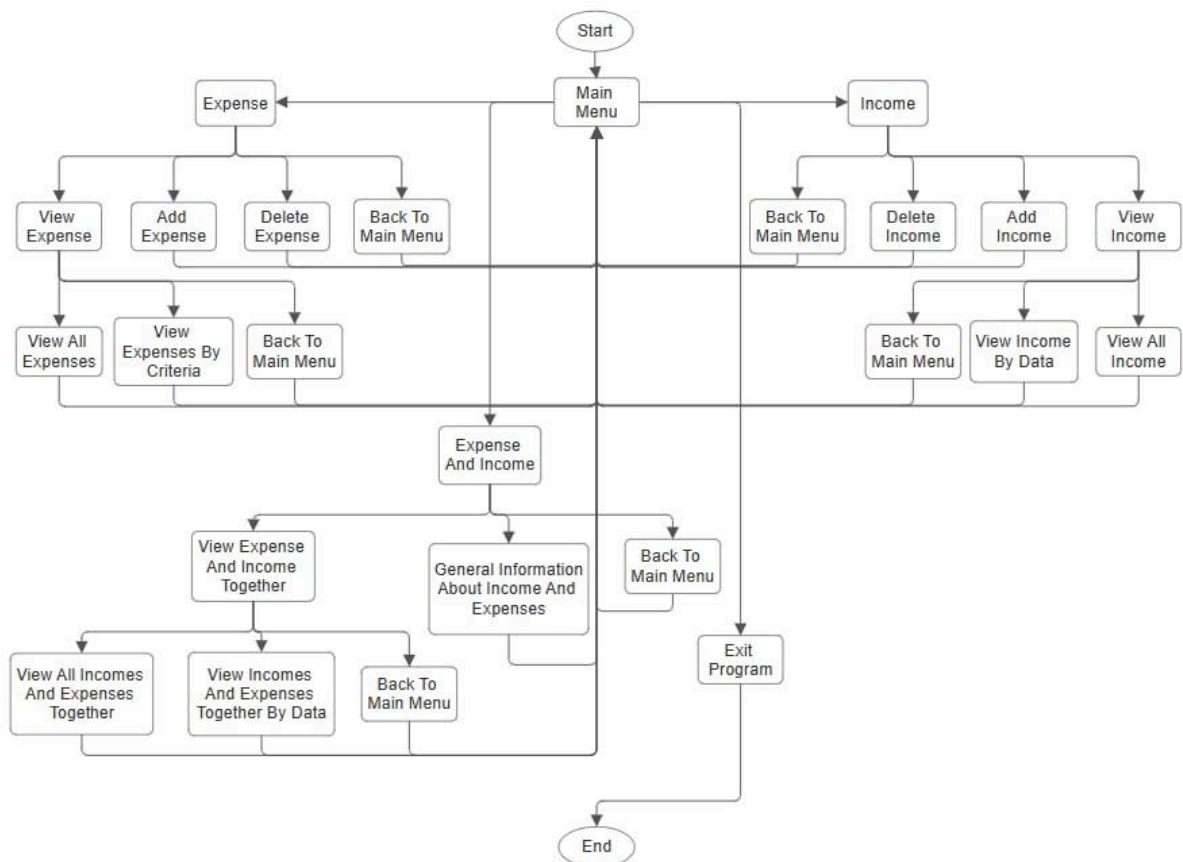

Structure of the project:

Use cases:

Activities:

Available features:

- ★ *Add expense*
- ★ *Delete expense*
- ★ *View expenses*
- ★ *View expenses by criteria*

To-be-implemented features:

- ★ *Add income*
- ★ *Delete income*
- ★ *View income*
- ★ *View income by date*
- ★ *View all income and expenses together*
- ★ *View all income and expenses together date*
- ★ *General information about income and expenses*

Instructions on how to run the project:

Open a program in which you can write in java language, create a project and add to that project all libraries and code files (that you downloaded from our git repository).
